SUMMARY

I am a motivated and detail-oriented Software Engineer with a Bachelor's in Informatics and Computer Engineering from the Faculty of Engineering of the University of Porto. I specialize in full-stack development with a strong focus on building intelligent, AI-powered systems — from end-to-end chatbots and information retrieval platforms to cataloging tools leveraging OCR and LLMs. I am passionate about the intersection of software engineering and artificial intelligence, and I thrive in collaborative environments where I can contribute to innovative, impactful products.

EDUCATION

Master in Computer Science

University of Copenhagen

Bachelor in Informatics and Computing Engineering

Faculty of Engineering of the University of Porto

EXPERIENCE

Armis

Hybrid

Software Engineer

Feb 2025 - Present

- Contributing to the creation and management of AI agents using Microsoft and Azure technologies.
- Building an AI-based information retrieval platform using PostgreSQL, Python, SQL, TypeScript, and Next.js. This platform allows users to submit and label various file types (images, videos, PDFs, voice memos, etc.), manually or using AI, and manage tags.
- Developed and integrated end-to-end chatbots, encompassing tool configuration, back-end logic, and front-end interfaces, enabling intelligent conversational experiences connected to internal systems.
- Built a cataloging platform that leverages OCR and LLMs to automatically extract and structure content from documents, allowing users to review and edit the extracted data through an intuitive interface.
- Developed a recommendation model to suggest the most reliable AI model for given datasets, with the aim of predicting the results more accurately.

Pyfusion (Startup)

Remote

Full Stack Developer

Jun 2024 - Jan 2025

- Led the development of the user interface for a bearing machine, primarily using React and Next.js to build a responsive, dynamic, and user-friendly front-end interface for machine control and monitoring.
- Focused on optimizing the performance and scalability of the interface, enhancing its responsiveness and stability for efficient machine operation and data management.

EXTRACURRICULARS

ShARE-UP

Jun 2024 – Jan 2025

- Developed data-driven marketing strategies and business plans.
- Executed projects for companies like WorkIN and AssetFlow, focusing on AI and market expansion.

NIAEFEUP

Nov 2023 – Present

- Contributed to the development of a user-friendly timetable platform for students, enabling seamless selection of university schedules using React, and also an Active member of the Marketing Department.

SKILLS & LANGUAGES

Technical Skills

- Languages: Python, JavaScript/TypeScript, SQL, C, C++
- Frameworks & Technologies: React, Next.js, Node.js, PostgreSQL, Spring Boot, Laravel

Spoken Languages

- Portuguese: Native
- English: Fluent
- German: A2
